Base map information shown on this FIRM was derived from digital orthophotography provided by the NAIP. This imagery was flown in 2015 and was produced at 1 meter resolution.

The AE Zone category has been divided by a Limit of Moderate Wave Action (LMWA). The LMWA represents the approximate landward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone and the LMWA or between the shoreline and the LMWA for areas where VE Zones are not identified will be similar to, but less severe than those in the VE Zone.

COASTAL BARRIER RESOURCES (CBRS) NOTE
 This map includes approximate boundaries of the CBRS for informational purposes only. Flood insurance is not available within CBRS areas for structures that are newly built or substantially improved on or after the date(s) indicated on the map. For more information see http://www.fws.gov/habitatconservation/coastal_barrier.html, the FIS report, or call the U.S. Fish and Wildlife Service Customer Service Center at 1-800-344-WILD.
